: ADD/I

From

Cuban Task Force

Subject

: Stennis Subconmittee Interim Report

- I have compared the public release of the sanitimed Stennis report with the drafts as last seen and approved by CIA and DIA representatives, and attack a list of the variations.
- 2. On page 17 the public release contains a reference to frequency of U-2 flights which the subcommittee staff had agreed, throughout our negotiations, to delete on security grounds. I feel the inclusion at this point was inadvertent.

25X1

accordingly is probably minimal.

- 3. The Subcommittee staff declined to qualify the mid-1963 estimate of 8,000 to 10,000 Seviets as a minimum, arguing that none of the testimony had been so qualified. We were so informed at the last meeting prior to release.
- 4. The staff agreed to reflect our explanation that the 17,500 estimate has not been changed "for technical reasons," but in crabking this in to the final version, added wording to indicate that the Subcommittee is not satisfied with this explanation.
